

Impact

Tens of thousands of presentations are given each day. They are intended to persuade, inspire and motivate.

- But how many presentations really make an impact?
- Which ones are remembered?
- When are you genuinely moved?

The More Effective Presentation Workshop helps you take the next step as a speaker, to ensure that your message is conveyed, understood and remembered - and with a positive effect for the company and, of course, you as a speaker.

Components

The successful More Effective Presentation Workshop by vDave Nelissen is filled with concrete tips & tricks demonstrated using practical examples.

Small groups are used for an optimum learning effect.

The following 4 Ps are covered during a session (4 hours):

- **Presenting**

What can we learn from Aristotle & Steve Jobs?

- **Process**

What is the best possible preparation?

- **PowerPoint**

How can I use visual aids effectively?

- **Practice**

How can I improve?

Output

After this workshop, the participants can hold demonstrable more effective presentations. The message is conveyed more profoundly, the visual aids support the story more effectively and the speaker makes a lasting impression.
